EUROPEAN LARCH (*Larix europea*)

L. H. Bailey in Cyclopedia of America Horticulture says, "The European Larch is an upright conical grower, and one of our best lawn trees. In the spring when it is covered with its new growth of soft, feathery, light green foliage, it is a striking and beautiful object, as it begins to grow at a low temperature, it is the first of our trees to be covered with new foliage. Again in the autumn it is very beautiful, as its needles turn a golden color before falling". VERY FAST GROWER
